ALL ABOUT — Rigid

AUFBAU SPC - SPC PER L'EDILIZIA

- Extra-matte PU-Nutzschicht + Alu-oxidiert, widerstandsfähig und pflegeleicht.
- Finitura extra-opaca in PU + ossido di alluminio antigraffio. Protezione superficiale durevole e facile da pulire.
- Extra Matt PU topcoat + Aluminium Oxide for anti scratch. Durable surface protection that is easy to clean.

- Höchste Widerstandsfähigkeit
Farb- und lichtecht, authentisches Erscheinungsbild, hoher Abriebschutz.
- Strato antiusura trasparente durevole.
Preserva il colore e la goffatura autentici, proteggendo dall'abrasione.
- Durable transparent wearlayer
Preserve the authentic colour and embossing, protecting from abrasion.
- Hochwertiger Dekorfilm.
Pellicola decorativa di alta qualità.
- High quality decor film.

- Aktuellste SPC-Technologie (Stone Powder Composite), Ultra-resistenter Kern, SPC-Technologie kombiniert mit Kalkpuder und Stabilisatoren für höchste Formstabilität. Enthält weder Schwermetalle noch Formaldehyd oder andere umweltbelastende Stoffe. Zu 100% ökologisch abbaubar bzw. recyclebar !
- La più recente tecnologia SPC (Stone Powder Composite) Anima rigida ultra resistente. L'anima in SPC è realizzata combinando polvere di calcare e stabilizzatori, per creare un nucleo dimensionalmente stabile e impermeabile. Questa pavimentazione non contiene metalli pesanti, formaldeide o altre sostanze nocive ed è ecologica al 100%.
- Latest SPC (Stone Powder Composite) technology Ultra strong Rigid core. The SPC core is made by combining limestone powder and stabilizers to create a dimensionally stable and waterproof core. Contains no heavy metals or formaldehyde nor any other harmful substances and is 100% environmental flooring.

Planken und Platten:

- IXPE-Unterlagsschicht, 1 mm dick, mit Kern verbunden, für eine optimale akustische Absorption und Gehfreundlichkeit.

Listoni e piastrelle :

- Substrato in IXPE da 1 mm fissato allo strato centrale. Miglior assorbimento acustico ed eccellente sensazione al tatto quando si cammina sul pavimento.

Planks & tiles:

- 1 mm IXPE underlay linked to core layer. Better sound absorption and excellent feeling while walking on the floor.

RIGID FLOORS & WALLS — 10 ADVANTAGES

VORTEILE - VANTAGGI

1. SCRATCH & SHOCK RESISTANT

Unsere SPC-Elemente sind mit einer zusätzlichen Schutzschicht aus Aluminium-Oxyd versehen, was eine hohe Resistenz gewährleistet und optimal vor Kratzern schützt.

Il nostro SPC è sigillato con un rivestimento in ossido di alluminio, un minerale naturale dall'altissima resistenza. Questo strato protettivo aggiuntivo garantisce che il pavimento non si graffi facilmente.

Our SPC is sealed with a coating in aluminium oxide, a natural mineral with very high durability. This extra protective layer ensures that your floor will not scratch easily.

2. WATER RESISTANT

Die SPC Bodenbeläge sind in hohem Masse wasserabweisend, was auch für unsere SPC-Wandelemente gilt.

Il legno nei pavimenti in parquet o laminato può danneggiarsi a seguito del contatto eccessivo con l'acqua. Con i nostri pavimenti in SPC, non c'è da preoccuparsi! Ogni singola fibra dei materiali di qualità dei pavimenti Rigid è completamente idrorepellente.

The wood in hardwood flooring or laminate can be damaged by excessive contact with water. With our SPC floors, you don't have to worry about that! Every fibre of quality material from Rigid Floors is completely water-repellent.

JESI

3. REALISTIC LOOK

Relief und Druckstrukturen bilden ein harmonisches Duo. Unsere Böden, Fliesen und Wand-Elemente sind durch optimierte Herstellungs-Techniken kaum unterscheidbar von natürlichem Holz und Stein.

Relief et impression, un duo naturel. I nostri listoni in SPC sono goffrati a registro (EIR), mentre le nostre piastrelle in SPC sono goffrate con effetto travertino, e sono pertanto quasi indistinguibili dal vero legno o dalla pietra.

Texture and prints are a natural duo. Our spc planks are embossed in register (EIR) and our spc tiles are travertine embossed, which makes it almost indistinguishable from real wood or stone.

LIMONCELLO - HERRINGBONE

4. EASY TO MAINTAIN

Alle Rigid Boden- und Wandelemente sind mit einer hoch wirksamen Schutzschicht versehen, welche nachhaltig vor hartnäckigen Flecken schützt.

Every Rigid Floor & Wall has a durable end wear layer that protects the floor throughout its life from penetrating stains.

I pavimenti e i rivestimenti a parete presentano una finitura durevole antiusura, che li protegge per tutta la loro vita, evitando la penetrazione delle macchie.

MONTALCINO

5. HIGHLY EFFICIENT ACOUSTICS

RigidFloor-Elemente sind mit einer zusätzlichen Schall-absorbierenden Schicht versehen. Beim Begehen kommt es somit nicht zu Trittschall-Geräuschen wie z.B. auf herkömmlichen Laminatböden.

I pavimenti Rigid hanno un substrato integrato ben isolante, nonché fonoassorbente. A differenza di quando si cammina su un pavimento in laminato, qui i passi non emettono alcun tonfo.

Rigid Floors have an integrated and well-insulating backing that absorbs sound. So no more hollow thud sounds as when walking on laminate floors.

6. PLEASANT TO THE FEET

Wie Ihr Schuhwerk auch ist – RigidFloor-Böden sind rutschfester als die meisten andern Bodenbeläge. Die Böden werden auch nie als "kalt" empfunden, was die wohnlichen Eigenschaften eindrucklich unterstreicht.

Rigid Floors have anti-slip properties that are much better than most other floor coverings, whatever footwear you own. An additional advantage, our SPC floors never feel cold.

I pavimenti Rigid hanno proprietà antiscivolo molto superiori a quelle della maggior parte dei rivestimenti per pavimenti, indipendentemente dalle calzature indossate. Vantaggio aggiuntivo: i nostri pavimenti in SPC non risultano mai freddi.

GUBBIO

7. EASY TO INSTALL

Unsere SPC-Böden sind mit einem raffinierten Click-System versehen, welches eine Verlegung zum Kinderspiel macht. Die SPC-Wandelemente sind mit Nut und Kamm versehen. Die zusätzliche Verweundung von Leim bietet eine maximale Stabilität.

I nostri pavimenti in SPC sono provvisti di un sistema a clic che permette di fissarli facilmente tra loro; ciò li rende facili e veloci da installare.

I nostri pannelli da parete in SPC sono dotati di un sistema con incastro a linguetta. Per la massima resistenza e sicurezza, vengono incollati alla parete.

Our SPC floors are provided of a click system that simply click into place, which makes it easy and quick to install.

Our SPC wall panels are provided of a tongue and groove system. They are glued to the wall to achieve maximum strength and security.

RIGID FLOORS - WITH CLICK SYSTEM

RIGID WALL - WITH T&G SYSTEM

BAROLO

8. STRONG & HIGH STABILITY

Der Kern unserer SPC-Elemente setzt sich aus Steinmehl und Polymeren zusammen, was eine ausserordentlich hohe Stabilität und Widerstandsfähigkeit bewirkt. Die Elemente eignen sich deshalb vorzüglich für eine extrem intensive Nutzung.

The core layer of our SPC consists of limestone and PVC, which makes the floor extra strong and stable. This type of floor is therefore also ideal for intensively used spaces.

Lo strato centrale del nostro SPC è composto da calcare e PVC e ciò rende il pavimento estremamente robusto e stabile. Pertanto, questo tipo di pavimentazione è ideale anche per gli spazi che vengono usati in modo intenso.

PALERMO

9. UV RESISTANT

Schicht versehen, die vor UV-Strahlung optimal schützt und so dauerhaft und nachhaltig die Licht- und Design-Echtheit gewährleistet.

I pavimenti e i rivestimenti a parete Rigid presentano una protezione UV ottimale, che permette di preservare il colore originale del pavimento SPC per lungo tempo ed evita le preoccupazioni causate da importanti differenze di colore.

Rigid Floors & Walls were given optimum UV protection, so that the original colour of your SPC floor is optimally preserved for a long time and you do not have to worry about important colour differences.

10. ANTI-ALLERGENIC-FREE FROM HARMFUL SUBSTANCES

Rigid Floor und Wall enthalten kein Formaldehyd oder andere schädliche Stoffe. Somit tragen sie Wesentliches zu einem gesunden Wohn-Ambiente bei.

Rigid Floors and Walls do not contain formaldehyde or other harmful substances. Our SPC have no negative influence on the healthy air quality of your home.

I pavimenti e i rivestimenti a parete Rigid non contengono formaldeide né altre sostanze nocive. Il nostro SPC non ha alcuna influenza negativa sulla qualità dell'aria della tua casa.

(*) Each length corresponds to the length of the product.

2. SKIRTING BOARD COVER - WITH T&G

- Eine Abdeckleiste verdeckt bestehende Sockelleisten und ermöglicht eine schnelle und saubere Renovierung.
- Una cornice copriplistello copre i battiscopa esistenti, permettendoti di rinnovare in modo rapido e ordinato.
- A skirting board cover conceals existing skirting, allowing you to renovate quickly and neatly.

3. T-PROFILE

- Verwenden Sie ein T-Profil, um den Übergang zwischen 2 Materialien mit gleicher Dicke zu gestalten.
- Utilizzare un profilo a T per la transizione tra due pavimenti dal medesimo spessore.
- Use a T-profile to make the transition between 2 floors of equal thickness.

5. STAIR TREAD WITH NOSING

- In einem schön gestalteten Innenraum fungiert der Abschluss der Treppe als Verlängerung des Bodens. Aus diesem Grund bietet Rigid Floors eine passende Treppenstufe als Vollwinkel an.
- In un interno ben progettato, la finitura delle scale funge da estensione del pavimento. Ecco perché Rigid Floors propone gradini con paragradini coordinati.
- In a nicely designed interior, the finish of the stairs acts as an extension of the floor. That's why Rigid Floors provides a matching stair tread with nosing.

Rigid — CARE

REGULAR MAINTENANCE FOR RIGID FLOORS

1. RIGID CARE

Zur regelmäßigen Pflege Ihres Rigid Floor: Mischen Sie 100 ml Rigid Care auf 10 Liter lauwarmes Wasser. Reinigen Sie den Boden mit einem gut ausgewrungenen Mopp oder Mikrofasertuch. Spülen Sie den Mopp/das Mikrofasertuch regelmäßig aus und wringen Sie ihn gut aus. Lassen Sie den Boden trocknen, ohne ihn abzuspolen.

Per la manutenzione regolare dei pavimenti Rigid: Miscelare 100 mL di Rigid Care ogni 10 litri d'acqua tiepida. Pulire il pavimento con un mocio ben strizzato o con un panno in microfibra. Sciacquare regolarmente il mocio / panno in microfibra e strizzarlo bene. Lasciare asciugare il pavimento senza risciacquare.

For regular maintenance of your Rigid Floor: Mix 100 ml of Rigid Care for every 10 liters of lukewarm water. Clean the floor with a well-wrung mop or microfiber cloth. Rinse the mop/ microfiber cloth regularly and wring it out well. Let the floor dry without rinsing.

Rigid WALLS — ACCESSORIES

1. OUTSIDE PROFILE

- Aluminiumprofil für eine Außenecke.
- Profilo in alluminio per la finitura di un angolo esterno.
- Aluminum profile for finishing an outside corner.

2. INSIDE PROFILE

- Aluminiumprofil zum Abschluss von Innenecken.
- Profilo in alluminio per la finitura di un angolo interno.
- Aluminum profile for finishing an inside corner.

3. END PROFILE

- Abschlussprofil aus Aluminium zur Einfassung von Wandpaneelen.
- Profilo di finitura in alluminio per i bordi dei pannelli da parete.
- Aluminum finishing profile for edging wall panels.
